DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I including claims 1-12, 14-20, 22, 26 and 27 in the reply filed on 7/28/05 is acknowledged.

Claims 13, 21, 23-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention.

Claim Objections

Claim 1 is objected to because of the following informalities: "the second reflective surface" in line 5 lacks of a proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 12, 14-18, 20, 22 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Jensen.

In regard to claims 1, 2, 12, 14, 16-17 and 20, Jensen discloses a deformable optical system comprising a reflection device (mirror 2) having a first reflecting surface and a second (back) surface; an integrated circuit actuator having movable extensions (3) extending from a support surface (4) and coupled to the second surface; electrodes

(3') individually coupled to corresponding ones of the extensions; and controller coupled to the electrodes to control the movement of the extensions (Figs. 1A and 5 and the accompanying text)

In regard to claims 3, 18 and 27, the support device (4) has been taken as piezoelectric chuck and the extensions (3) have been taken as piezoelectric pins formed on the piezoelectric chuck.

In regard to claims 15 and 22, see column 4, lines 53-54.

Allowable Subject Matter

Claims 4-11, 19 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the applied prior art fails to teaches or suggests a deformable optical system having the structure specified in claims 4-11, 19 and 26.
